Skills

JavaScript | TypeScript
HTML5 | CSS3 | SASS
CSS modules
React | Redux/toolkit
Jest | RTL | Cypress
Eslint | Stylelint | Prettier
Git | Github
Framer motion
Docker
Figma

Languages

Russian	Native
English	B1

Hobbies

Diy, arduino, custom
mechanical keyboards, hiking

About me

I'm passionate Frontend developer and fast learner, persistent at attending my goals and very motivated to move forward. I have experience working with JS, TS and React at fairly complex level and looking for new challenges and opportunities

Work experience - 7 Months

Aston(ex.Anderson) - Frontend developer (internship)

August 2022 - October 2022

JS-Core intensive

Description: Improved my overall knowledge of JS while attending online lectures and successfully completed all homeworks, gained confidence while working with implicit conversion, promises, classes, this context, asynchronous code. Gained knowledge about OOP, SOLID principals, prototypes, object descriptors, primitives autoboxing, TDZ, hoisting, closures, event loop

Project link: https://github.com/maslomeister/js_intensive

React-Core intensive

Description: Improved my knowledge of React, gained confidence while working with various hooks, created simple web form and online shop. For online shop i built nodejs api, frontend was created with react and almost fully covered with unit and integration tests. Gained knowledge about reconciliation, fiber.

Technologies used: React.js, redux without toolkit, css modules, react router, jest, react testing library, nodejs, express.

Easy heatmap (Hobby project)

July 2022 - August 2022

Description: Online web tool that can help with creation of beautiful looking heatmaps for qmk compatible mechanical keyboard

Technologies used: React.js, react router v6, redux/toolkit, typescript, scss with modules, heatmap.js, drawing using canvas, eslint, prettier, stylelint, husky for linting on pre-commit, github actions for auto build generation on push to master branch and uploading build to github pages.

Project link: <https://github.com/maslomeister/easyheatmap>

Yandex Practicum - Frontend developer (online course)

March 2022 - July 2022

«Stellar Burgers»

Description: Assembling and ordering burgers using drag and drop, registration, authorization, ability to view orders feed, animated route transitions, getting data from api and web sockets using RTK Query, unit and E2E testing

Technologies used: React.js, react router v6, typescript, css modules, eslint, prettier, redux/toolkit, framer motion, react dnd, websocket, jest, cypress, rest api.

Project link: <https://github.com/maslomeister/react-burger>

Project kitchen

Description: While working in team we rewrote class based React app to functional components, redesigned it and replaced css library with css modules, i configured eslint with typescript, stylelint and prettier to create uniform code style for our team and rewrote few class based components
