Nikita Maslov

Armenia, Yerevan

Frontend developer

✈ maslomeister.t.me ✉ maslomeister@gmail.com ⚙ maslomeister in maslomeister

Skills

JavaScript | TypeScript

Nodejs

fetch/axios

HTML5 | CSS3 | SASS

CSS modules

React | Redux/toolkit

Nextjs

Jest | RTL | Cypress

Eslint | Stylelint | Prettier

Git | Github

Framer motion

Figma

Strapi

Linux | Docker | Nginx

Languages

Russian	Native
English	B2

Hobbies

Diy, arduino, custom mechanical keyboards, hiking

About me

I'm passionate Frontend developer and fast learner, persistent at attending my goals and very motivated to move forward. I have experience working with JS, TS and React at fairly complex level and looking for new challenges and opportunities

Work experience - 10 Months

Bezperesdach - Fullstack developer (Hobby project)

September 2022 - January 2023

Description: Hobby project that aimed at helping students with education - https://bezperesdach.ru

Frontend

Description: Created Frontend using React, Nextjs and Typescript. Implemented SSR/SSG for some pages. Most of the design is made by following Figma layout, but some components made by me from scratch

Technologies used: Nextjs, TypeScript, CSS modules, fetch, formik, react-select, framer-motion, stylelint, eslint, prettier, google recaptcha v3.

Project link: https://github.com/bezperesdach/bezperesdach_frontend

Backend

Description: Created backend using Strapi with addition of some handmade solutions. Backend is self hosted, configured Nginx as a reverse proxy for Nodejs application.

Technologies used: Nodejs, Strapi, Nginx.

Aston(ex.Anderson) - Frontend developer (internship)

August 2022 - October 2022

JS-Core intensive

Description: Improved my overall knowledge of JS while attending online lections and successfully completed all homeworks, gained confidence while working with implicit conversion, promises, classes, this context, asynchronous code. Gained knowledge about OOP, SOLID principals, prototypes, object descriptors, primitives autoboxing, TDZ, hoisting, closures, event loop

Project link: https://github.com/maslomeister/js_intensive

React-Core intensive

Description: Improved my knowledge of React, gained confidence while working with various hooks, created simple web form and online shop. For online shop i built nodejs api, frontend was created with react and almost fully covered with unit and integration tests. Gained knowledge about reconciliation, fiber.

Technologies used: React.js, redux without toolkit, css modules, react router, jest, react testing library, nodejs, express.

Project link: https://github.com/maslomeister/react-form
